The Very First Light: The True Inside Story of the Scientific Journey Back to the Dawn of the Universe. John Mather, Author, John Boslough, With Basic Books <https://www.publishersweekly.com/978-0-465-01575-7>

Astronomers use a beam of light as their reference to finding distances to space objects. First, light is convenient. Throughout the universe, all light travels at exactly the same speed: about 670 million But there's a catch: we cannot say that the edge of the visible universe is 14 billion light-years away.
